## PERSONAL PROJECTS

### Clone of Facebook

- Link - [ninjaocus.com](https://ninjaocus.com)
- **Functionalities** -- **Sign-in**/Sign-up with **Google** / Ninja Locus itself, **adding and accepting friends**, **posting (texts, images, videos)**, **comments**, **likes**, user's profile page, **Chatting Engine**(chat with friends), Search Engine, forgot password etc
- Interacts with user **through notification** and **sends email** to the user.
- Also implemented api for the developers to use it and build amazing app

### React- Social Media Website

- **Github link** - <https://github.com/sumit-kumar-yadav/React-Social-Media-Website>
- **Functionalities** - Adding friends, posts, comments, group chatting with friends

### Movie List Web App

- **Github Link** - <https://github.com/sumit-kumar-yadav/React-movie-app>
- **Functionalities** - Search any movie and add it in your favourite list.
- This is built using React.js library. In this I have used an api to fetch the movie lists.

### Portfolio

- Link - <https://sumit-resume.netlify.app/>
- This is my portfolio built using HTML, CSS and JavaScript.

### Ping-Pong Game

- Link - <https://play-ping-pong-game.netlify.app/>
- It's a game made from scratch using HTML, CSS and JavaScript.
- It even **shows** the current **score** and maximum score of users.
